

PROCESS FLOW / FLOW CHART

Ang process flow o flow chart ay isang tool upang mahati ang mga proseso sa mga individual na pangyayari. Ginagamit ito upang mas maging maayos ang pag-unawa sa mga proseso at upang mas madali itong ma-communicate.

Ang mga proseso ng mga pangunahing produkto at serbisyo ay naka-summarize sa mga process flow na ipanapakita sa section na ito. Ang bawat isang pangunahing produkto at serbisyo ay may tatlong klase ng process flow depende sa klase ng membership ng target client.

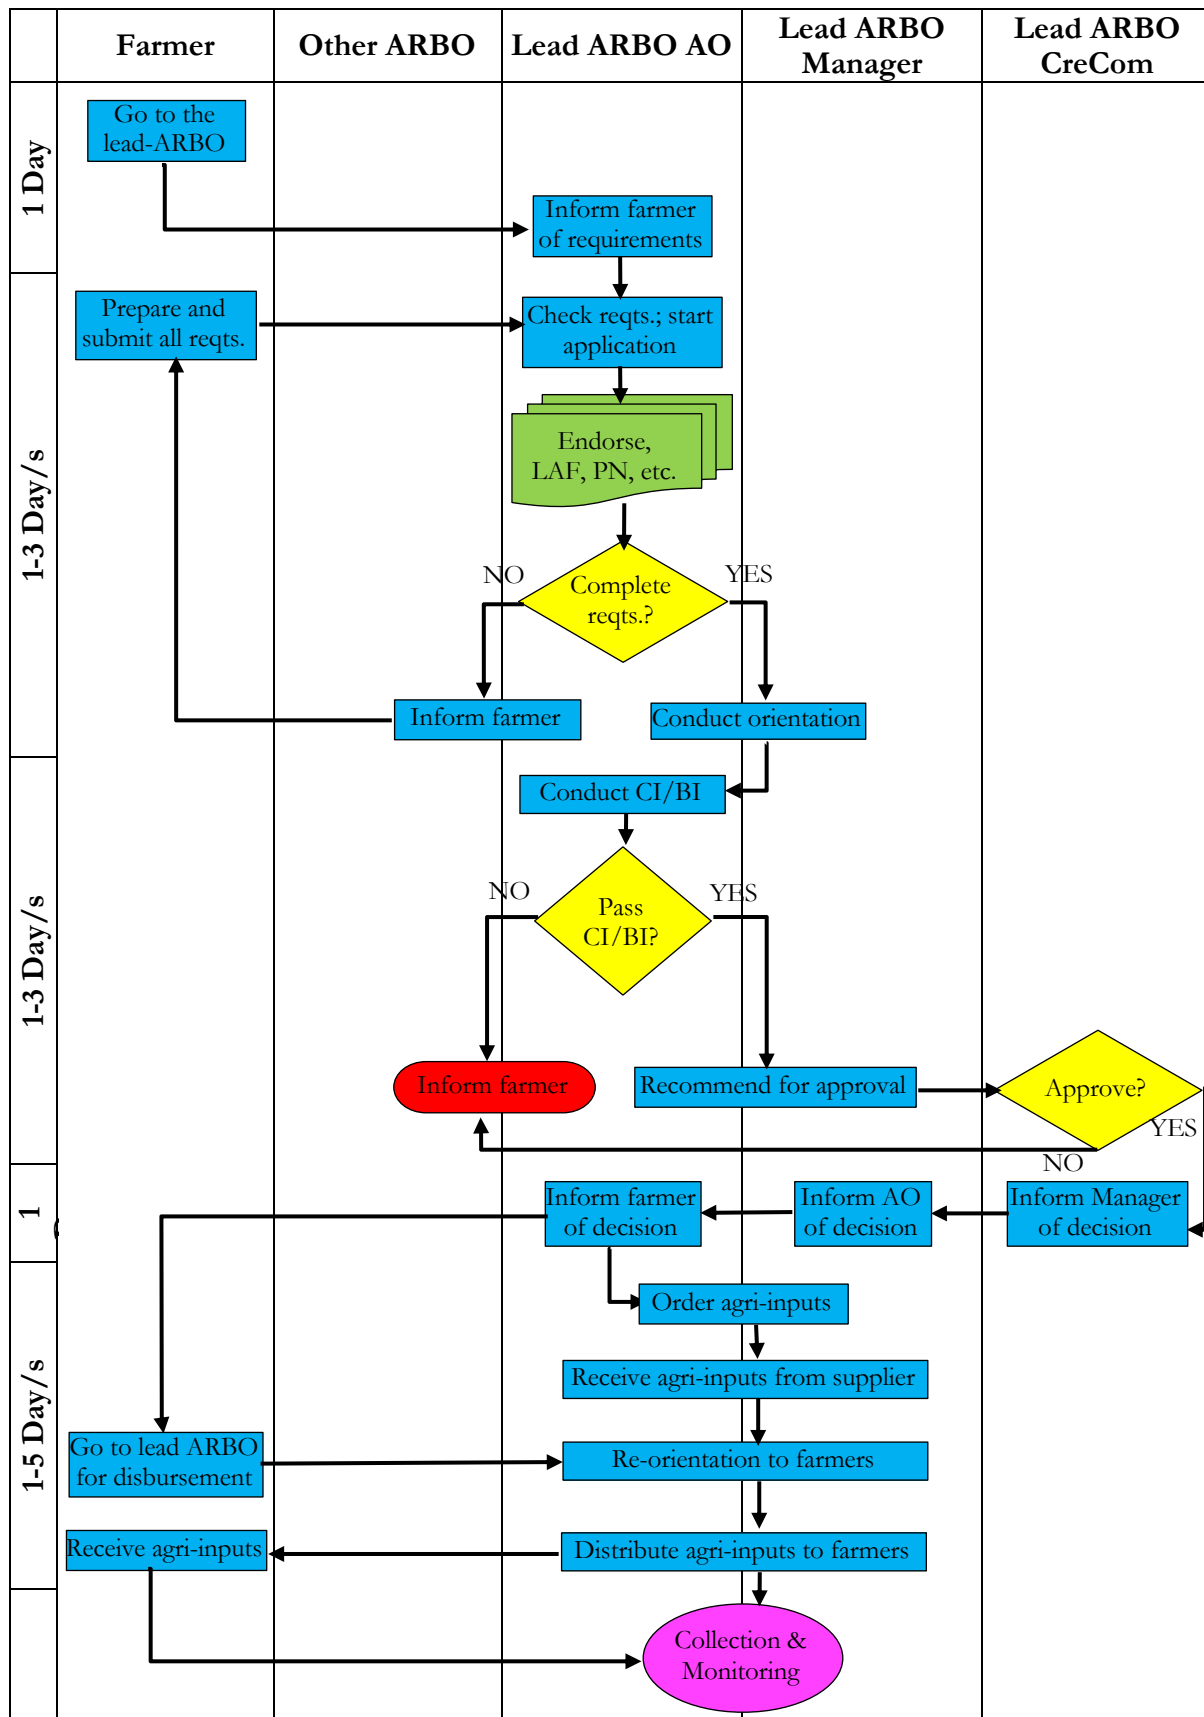

Upang maisalarawan ang process flow, kinakailangan ipakita ang mga conventions na gagamitin sa chart. Ang mga flow chart conventions ay nakalagay sa table sa ibaba.

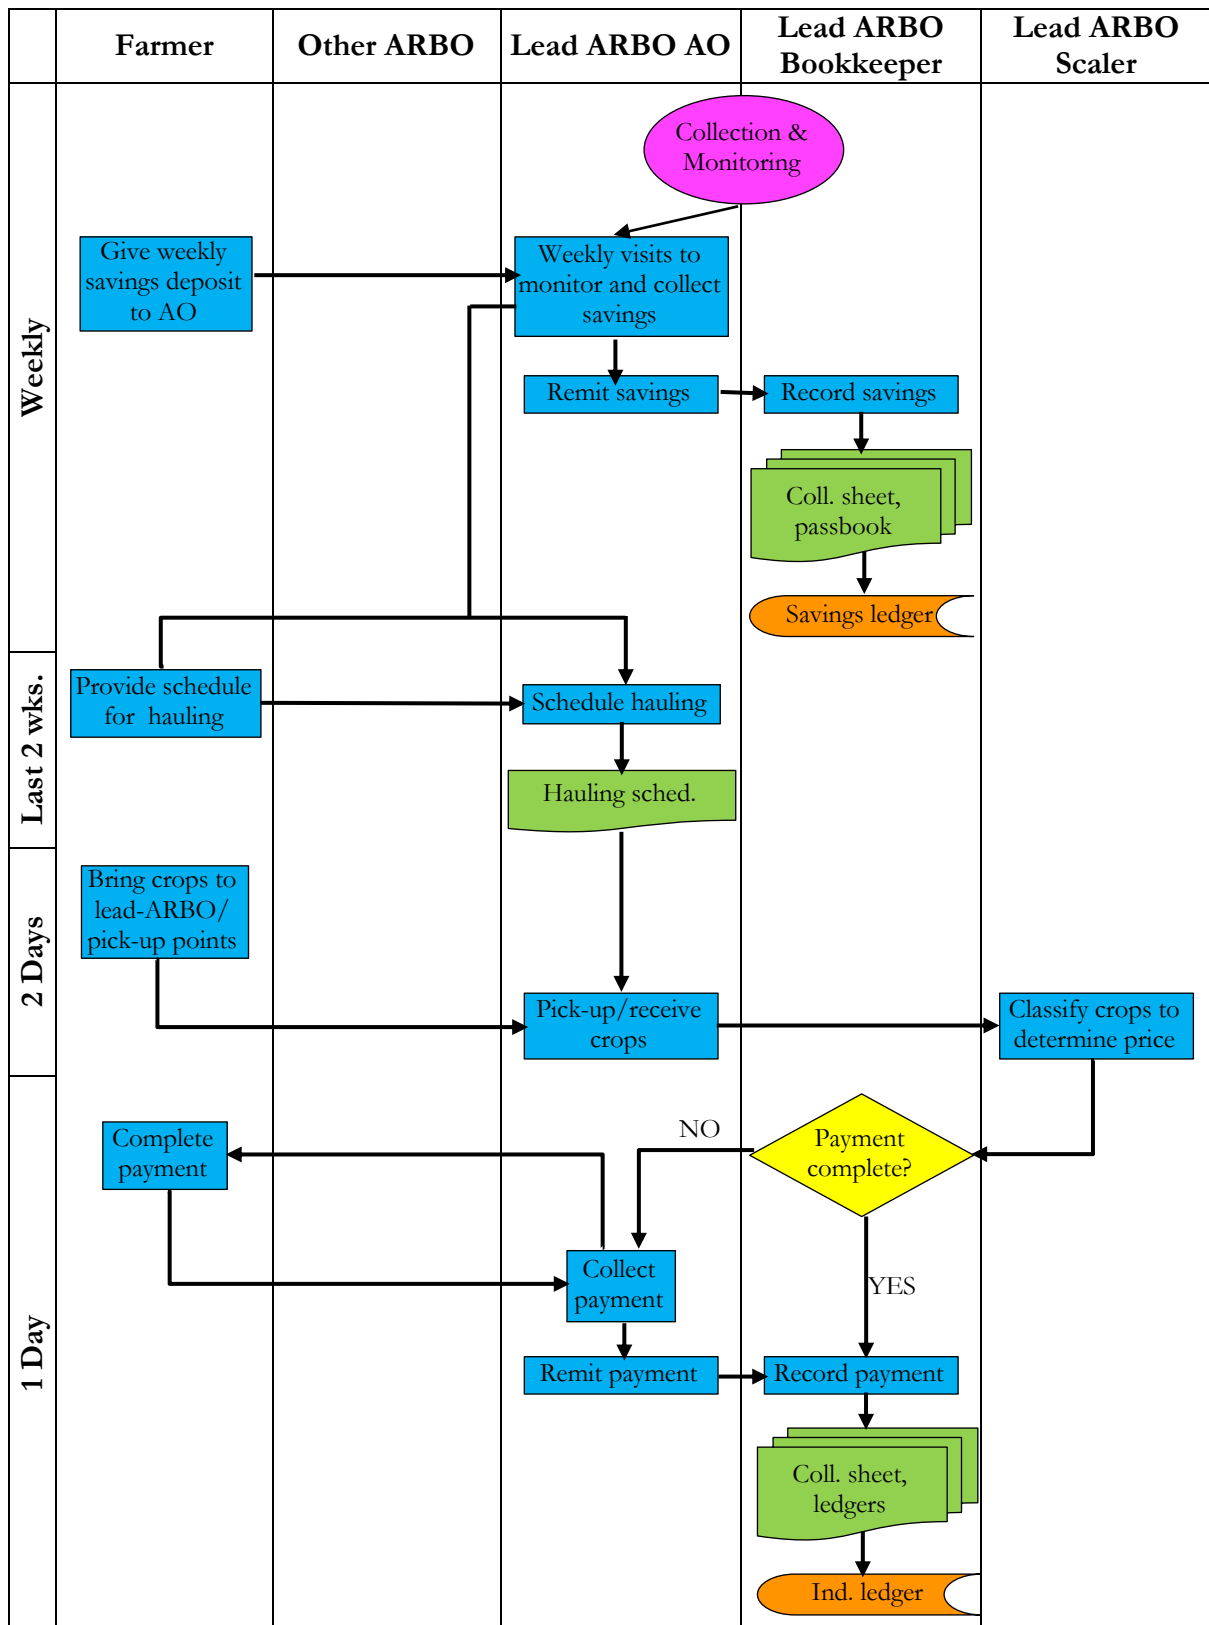

Flow Chart Conventions

| Symbol | Description |
|---|--|
|  | Process Symbol – kumakatawan sa mga proseso, aksyon, o gawain |
|  | Decision Symbol – punto o sanga kung saan kailangan gumawa ng desisyon |
|  | Document Symbol – ginagamit upang kumatawan sa kahit anong uri ng dokumento o hard copy input o output |
|  | Terminator Symbol – isang start o stop na punto |
|  | Connector Symbol – gingamit para tumalon mula sa isang punto papunta sa iba pa |
|  | Storage Data Symbol – general data storage o taguan ng data |

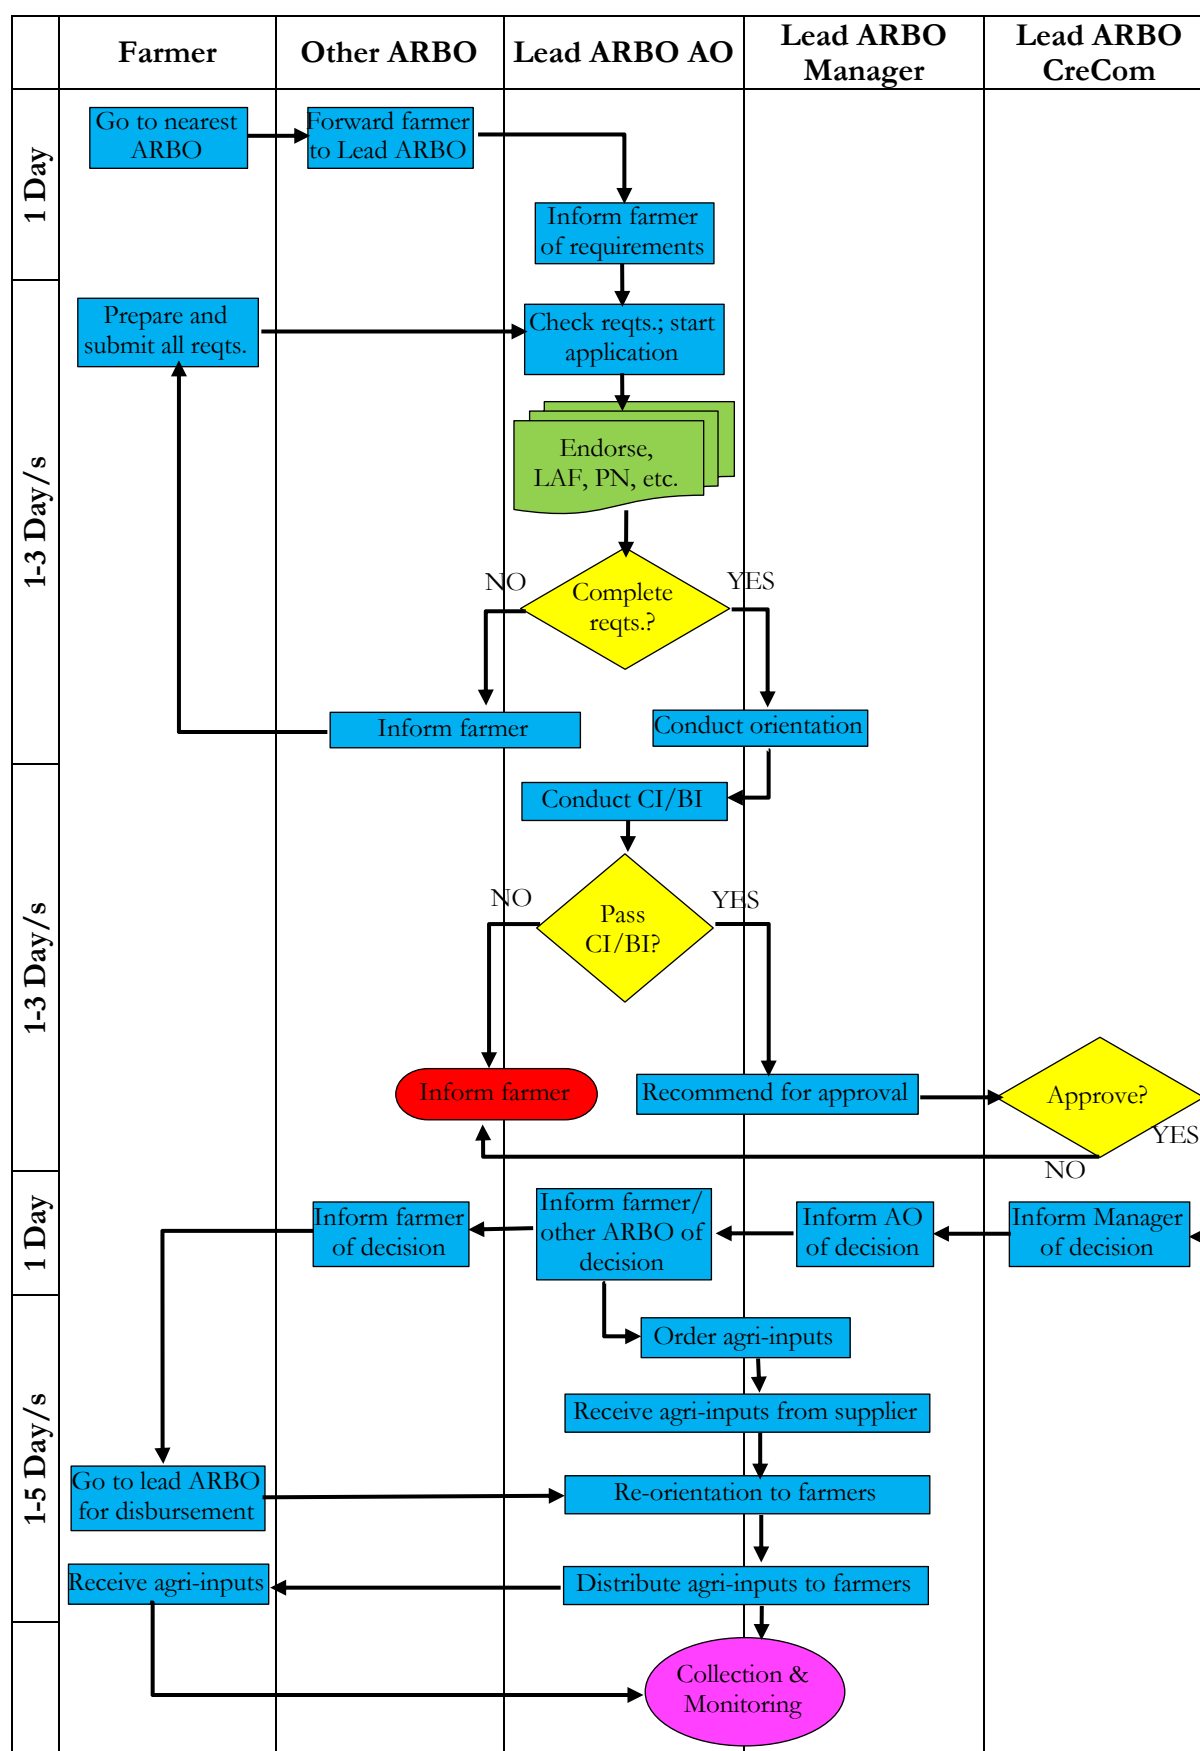

Ang mga flow chart conventions na nabanggit sa itaas ang siyang gagamitin upang mailarawan ang iba't ibang proseso sa pagbibigay ng produkto at serbisyo. Ang mga ito ay nakalagay sa mga susunod na tables sa section na ito.
